About C5i

About C5i

Value Proposition

We deliver business impact at speed and scale by driving trustworthy intelligence leveraging AI technology and human expertise, with adoption, innovation and customer obsession as our guiding principles.

Our Vision

Be amongst the top 5 pure play analytics and AI solution providers globally, known for innovation and driving adoption; delivering meaningful business impact across our client base.

Our Mission

Nurture and amplify human potential through AI and Analytics, and leverage it to drive transformational business and societal impact.

02

Design Guidelines

Logo

Overview

We embrace the multifaceted nature of data by exploring it from various angles, uncovering insights that lie beyond the surface. We navigate through layers of information, each perspective adding depth and richness to our understanding. Whether it's examining data through the lens of consumer behaviour, market trends, or technological advancements, we strive to capture the full spectrum of insights.

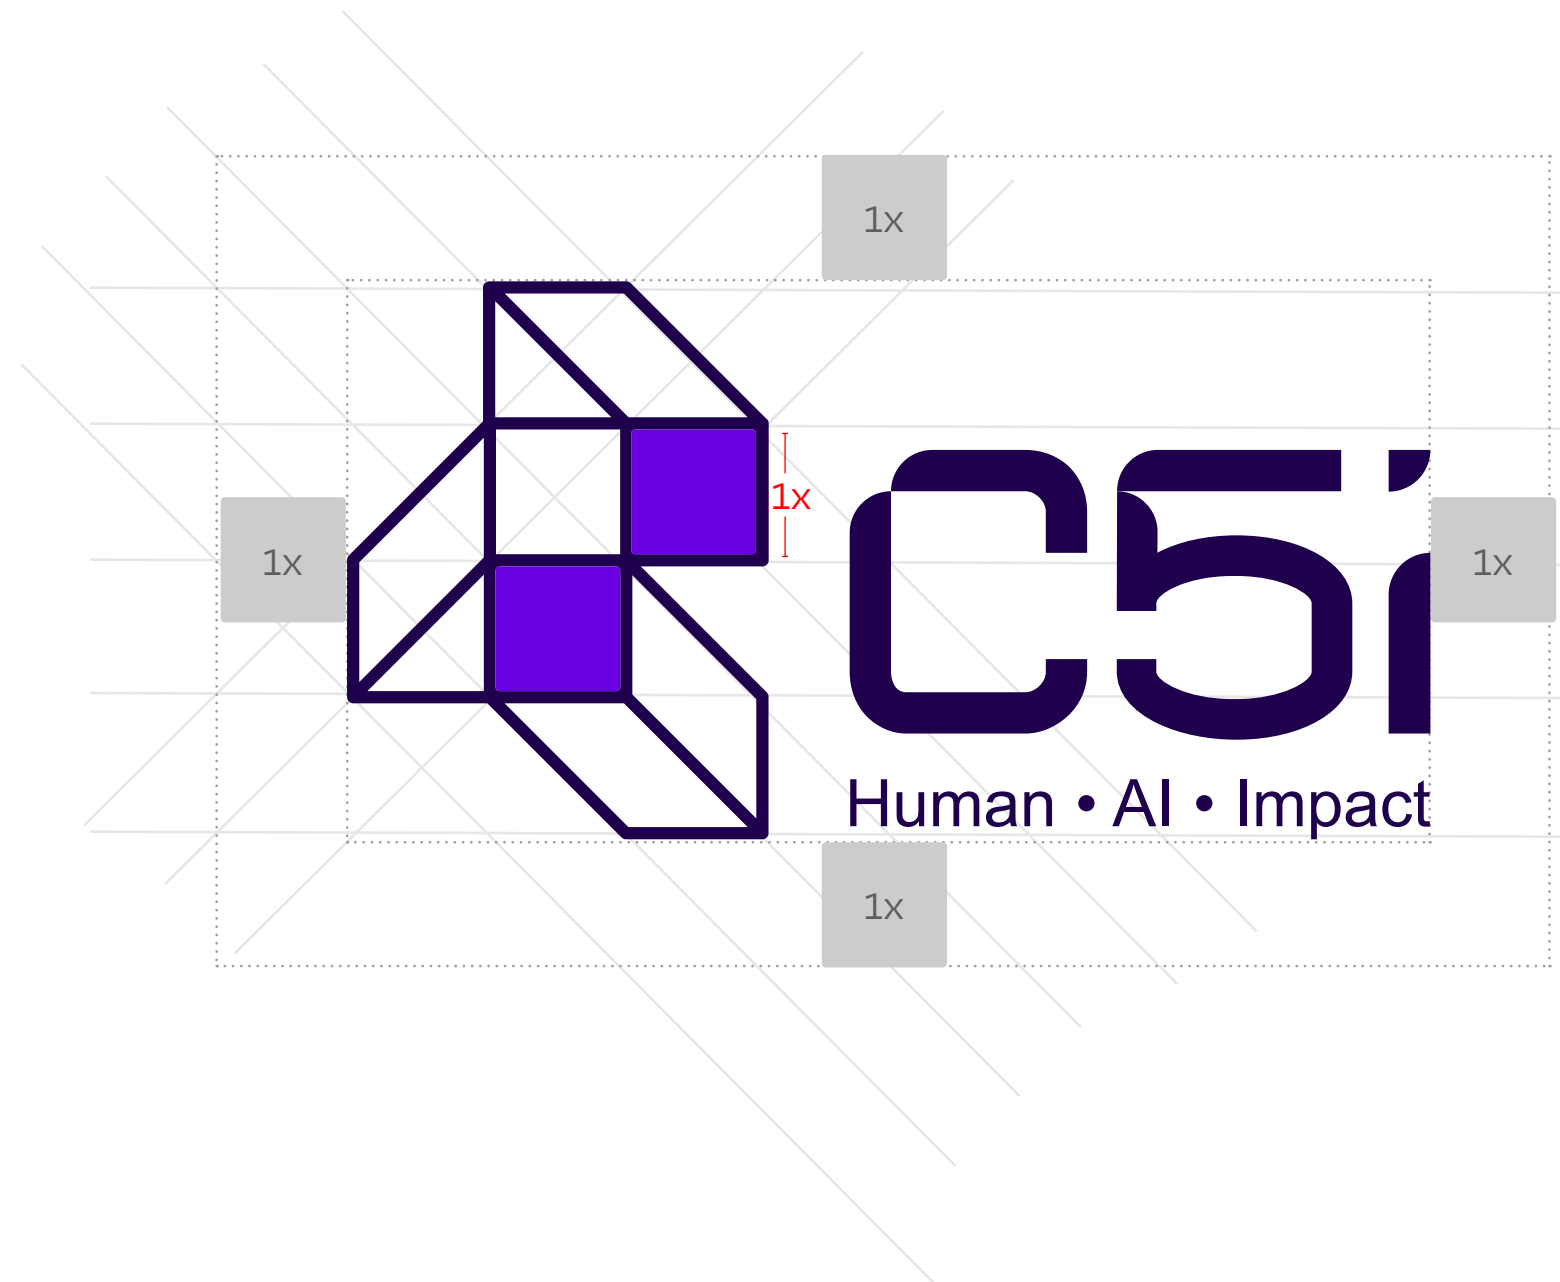

Logo

Construction

In the logo, each shape is not just a form, but a perspective—a unique angle through which we view the world of data. Our multidimensional mark refracts data into a myriad of insights. Each angle represents a new viewpoint, a fresh lens through which we glean understanding and unlock potential. Together, these perspectives converge to form a cohesive whole, symbolising our commitment to comprehensive analysis and holistic insights.

Clear Space

Clear space buffers the logo from surrounding content to ensure that it creates an impact on the visual. ***Ensure the logo has global breathing room of 1x or more, where x=the reference size (side of the purple box within the logo mark).***

Logo

Structural Variations

1. Full color logo

The primary logo for C5i is the full color logo with tagline. The tagline may be omitted when the logo is used at smaller sizes.

2. Single color logo

The single color logo may be used to enable sufficient contrast for the logo over images.

3. Responsive logo

Responsiveness helps the logo adapt to various digital devices to consistently convey a superlative visual experience. It is an essential element in the age of mobile-first experiences. The C5i logo can be substituted by the glyph alone when space is restricted, such as favicons.

1. Full color logo

Primary (with Tagline)

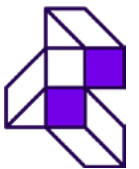

Secondary (without Tagline)

2. Single color logo

3. Responsive logo

Logo

Structural Variations contd.

4. Partnership logos

There may be situations where the C5i identity is placed along with symbols/logos of other organisations. In such a scenario first attempt should be made to give more importance to the C5i identity. However, this will vary based on the partnership.

Partnership logos are a structural variation on the primary logo. Preferred combinations are shown on this page. The C5i logo shall be kept towards the left during horizontal layouts, and on the top during vertical layouts, as shown here. Ensure that specifications for clear space and safe zone between logos are followed as illustrated. Horizontal Layouts will include a separator bar with clear space, as illustrated here.

Vertical Layouts

Horizontal Layouts

Logo

Color Variations

Full Color

The full-color version of the logo represents the brand in its complete vibrancy.

Monochrome

The monochrome version ensures adaptability in scenarios where color reproduction is limited.

Reverse

A reverse version of the logo has to be used on dark backgrounds.

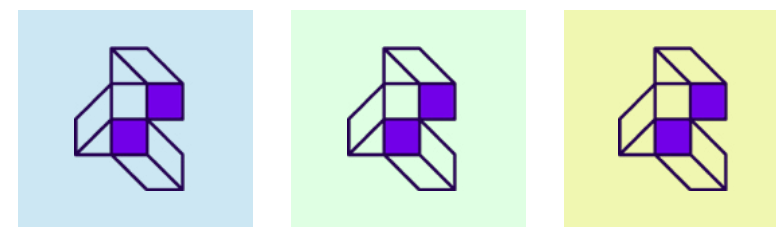

White Background

Black Background

Light Shade Background

Dark Shade Background

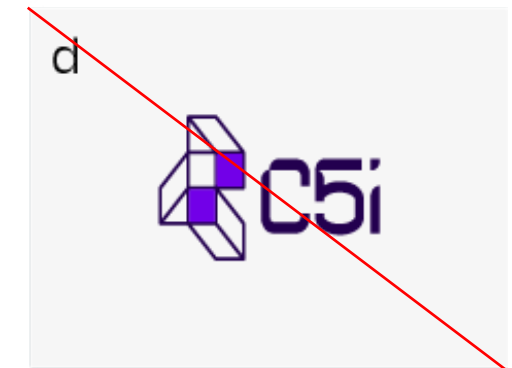

Logo

Prohibited use

Protecting the integrity of our brand is essential for maintaining a consistent and positive image. This document outlines the guidelines for the prohibited use of our logo to prevent any misuse or misrepresentation that could compromise the brand identity.

Don'ts

- a. Do not re-color the logo
- b. Do not reverse the logo
- c. Do not rotate the logo
- d. Do not skew the logo
- e. Do not outline or stylize the logo in any way
- f. Do not add effects to the logo, such as drop shadows
- g. Do not place the colored logo on a color background without isolating it using an overlay
- h. Do not change the transparency of the logo

Colors

The color palette symbolizes creativity, innovation, and sophistication, evoking a sense of intelligence and futurism, and aligning perfectly with the forward-thinking nature of C5i. It represents the company's commitment to pushing boundaries and pioneering new solutions in the ever-evolving field of artificial intelligence.

Colors

The secondary colours can be used to segregate information when the primary brand colours are not sufficient. Do not overuse the secondary palette. Use it for functional communication such as infographics, presentations, case studies and brochures.

The Gradient may be used to add depth in illustrations, infographics and other creative compositions

Gradient

Typography

Overview

Typography is a powerful aspect of our brand identity, shaping the way our message is communicated and reinforcing our brand personality. This document outlines comprehensive guidelines for the use of typography to ensure consistency, readability, and a cohesive brand presence across various mediums.

The **Degular font family** is available for purchase and licensing in all formats on **Adobe Fonts**.

**Only the official typeface from Adobe Fonts may be used. Use of free versions of this typeface is not permitted by copyright law, and may attract legal action. If this typeface is not available for any reason, the secondary typeface must be used (see Pg 16).*

Font Family

Degular Regular

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
(.,:;!€£\$%&@/#-*) 0123456789

Degular Medium

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
(.,:;!€£\$%&@/#-*) 0123456789

[Install Degular font family](#)

Degular Semibold

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
(.,:;!€£\$%&@/#-*) 0123456789

Typography

Hierarchy

This system ensures a clear and organized structure in various communications.

**All fonts will have a line spacing of font size + 8px;
e.g. 64px will have 64+8=72px line spacing*

THIS IS A TAG

This is a heading

Typography

Secondary Typeface

The fallback typeface Segoe UI can be used when Regular is not available. This may be used in creating presentations and other internal documentation.

Font Family

Segoe UI Regular

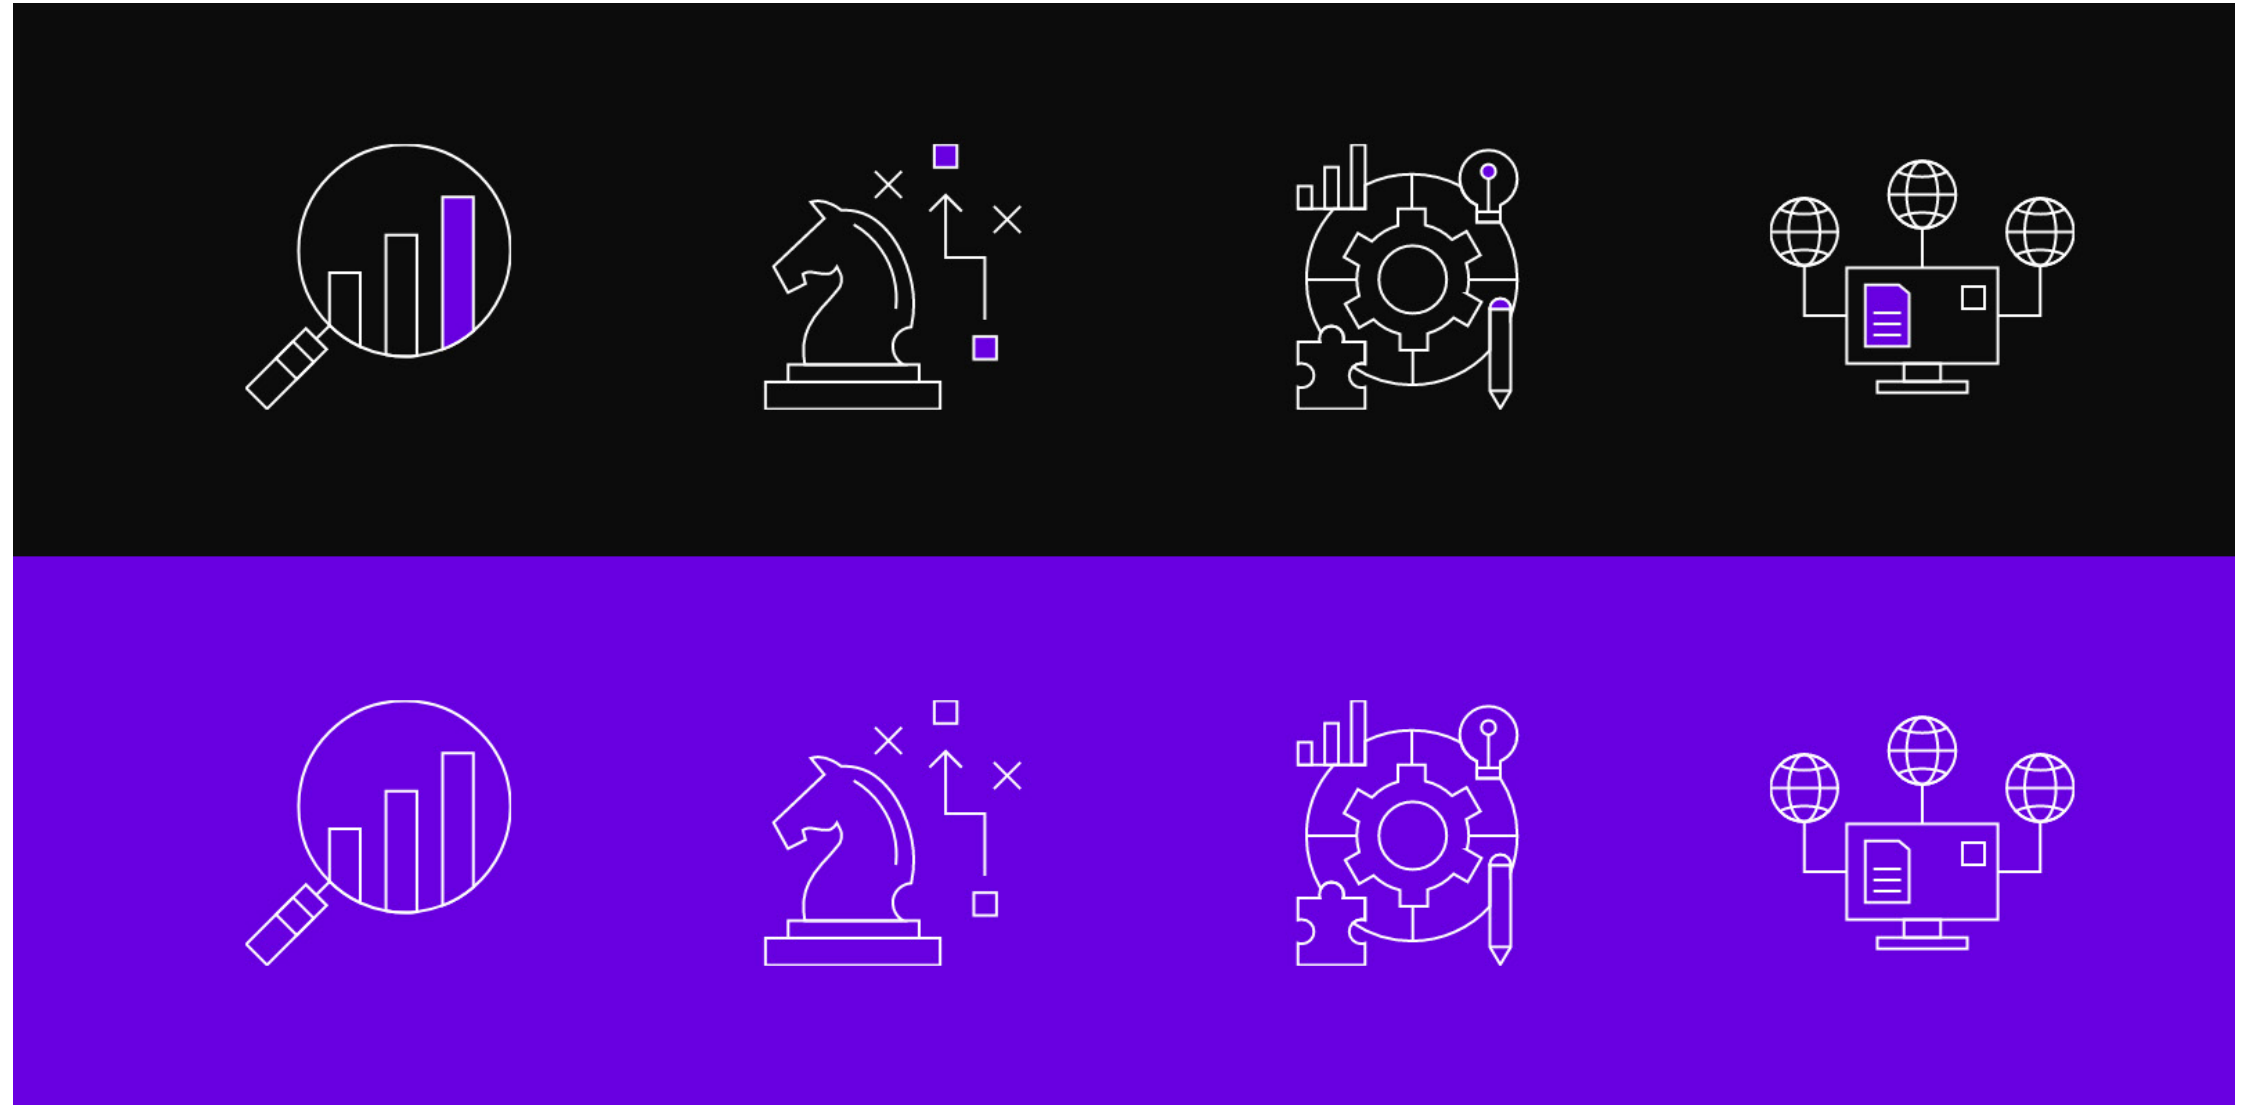

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz

Segoe UI Bold

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz

Icons

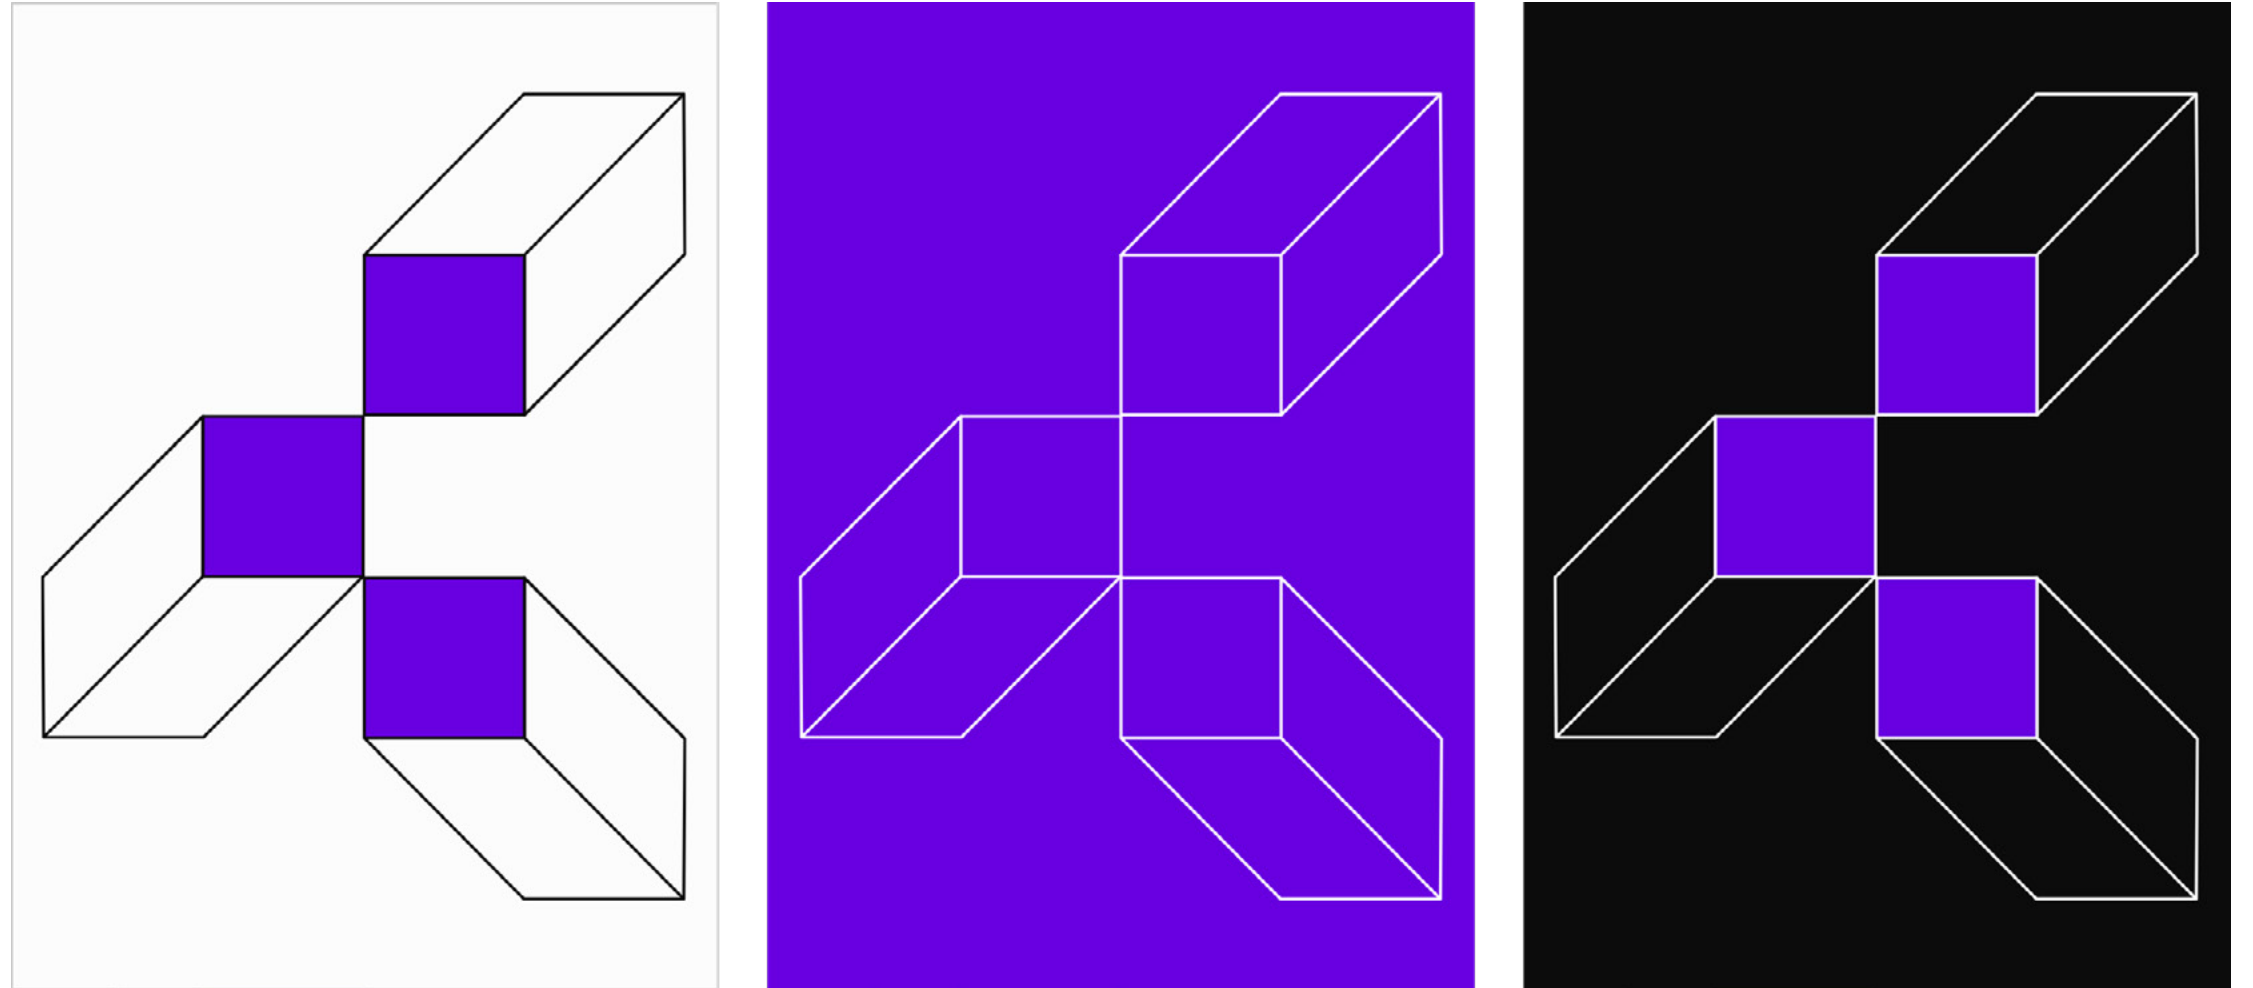

The brand icons are created with functionality in mind. The icons are constructed from thin contrast color strokes, using purple accents. Icons are used to represent sub capabilities of our products on the website, as well as general use in presentations and thought leadership documents.

Design Element

The design element is created by joining two or more perspective cuboids. Each cuboid must be in contact with at least one other. The cuboids must be in the appropriate color according to the background. The device may also be used without any fill (see pg X), and may be used to create compositions using imagery (see pg X).

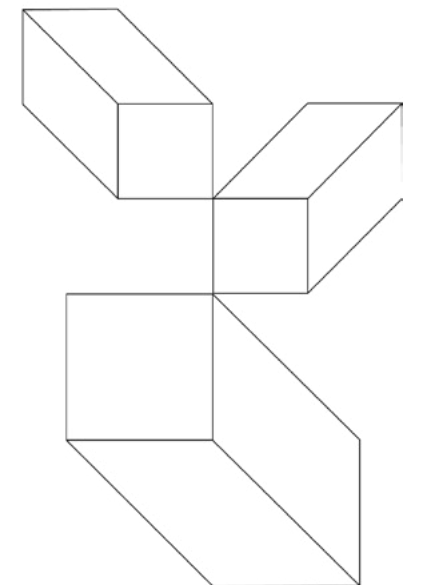

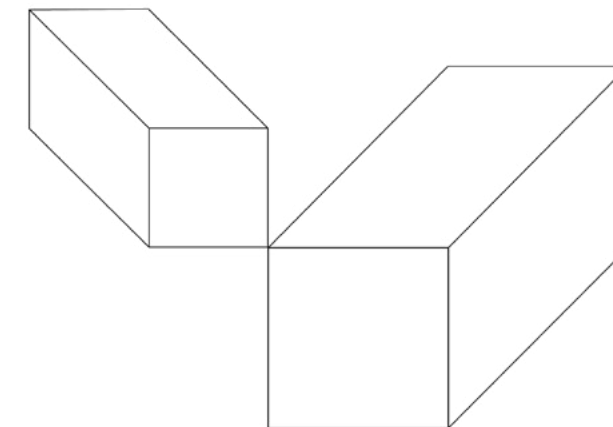

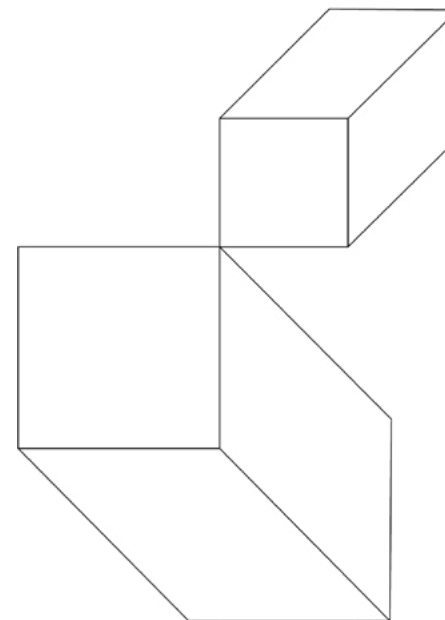

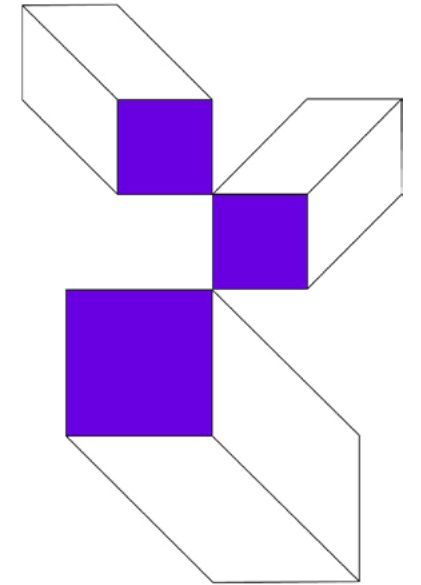

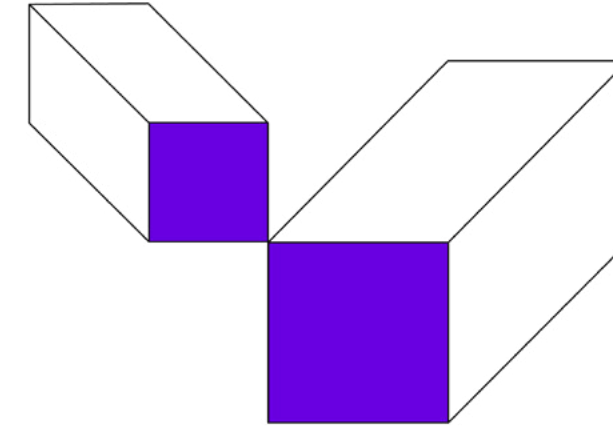

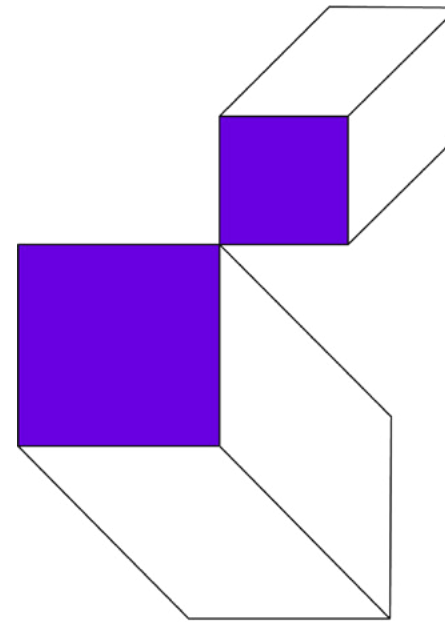

****A stroke weight of 2px must be used on a web banner of size 1366x664px.***

Design Element

The design element is created by joining two or more perspective cuboids. Each cuboid must be in contact with at least one other. The cuboids must be in the appropriate color according to the background. The device may also be used with only outline, and may be used to create compositions using imagery (see pg 25-26).

****A stroke weight of 2px must be used on a web banner of size 1366x664px.***

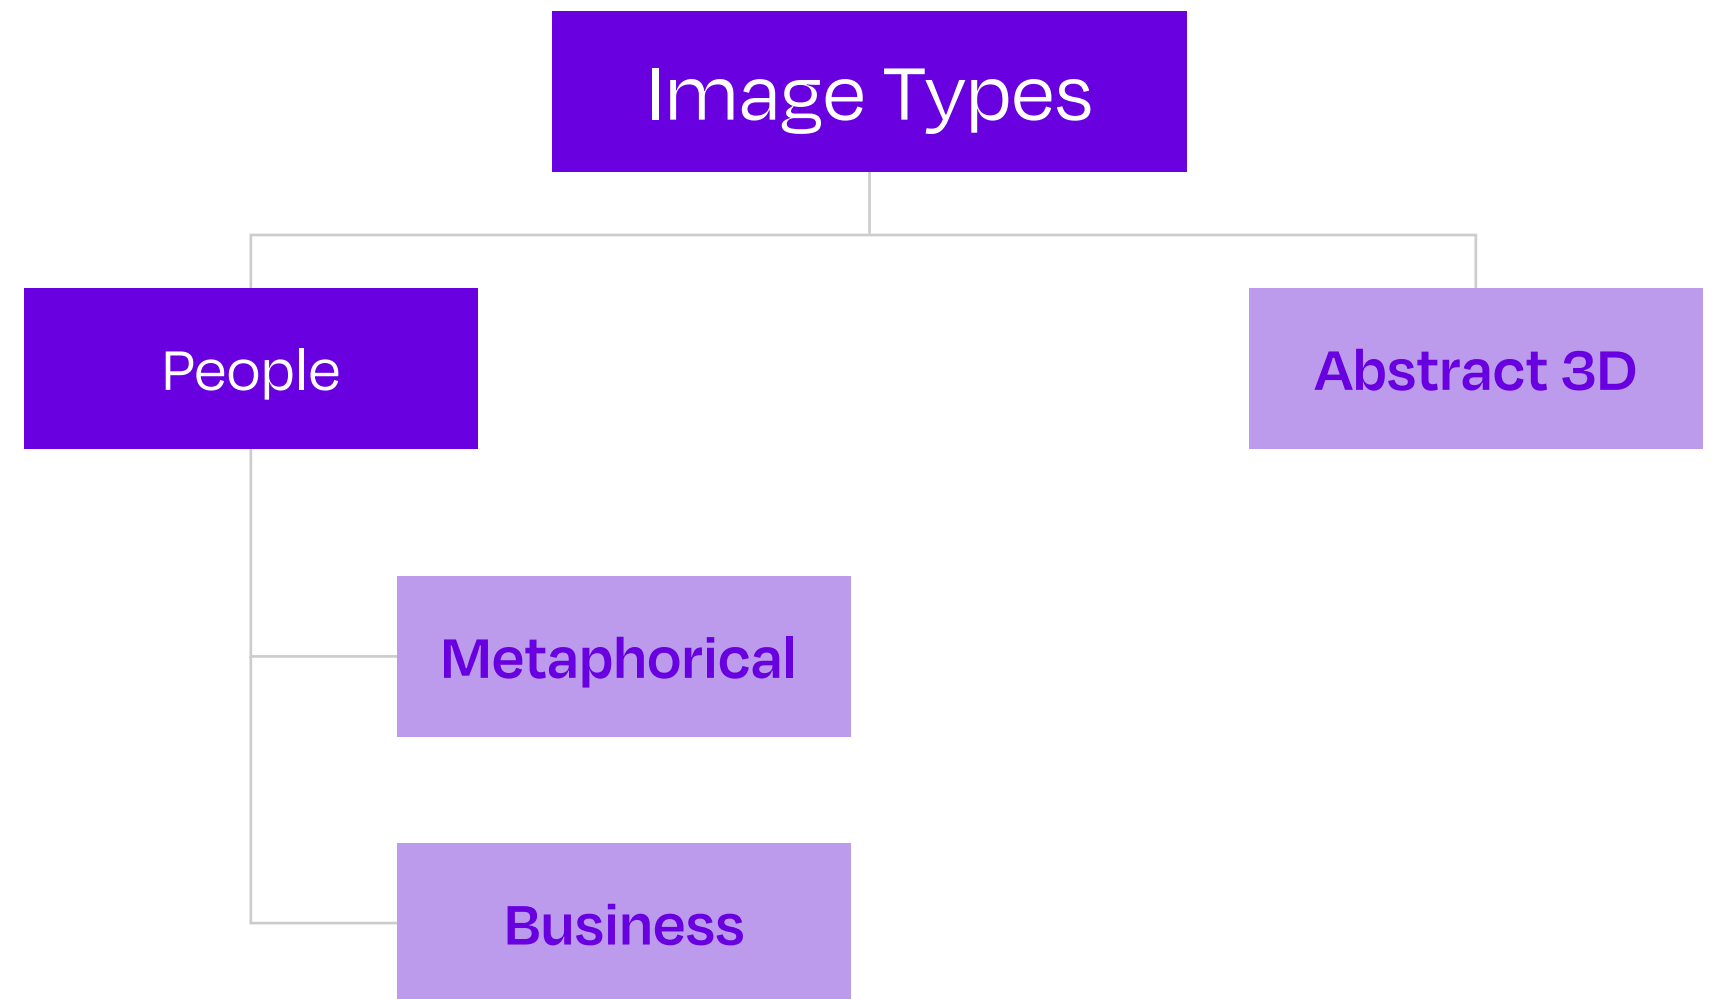

03

Images & Treatment

Images

Types of Imagery

We use three types of imagery in our brand communication, grouped into two buckets as shown in the diagram.

Images

Abstract 3D

Abstract 3D imagery is used in representing our Platforms and Solutions. Use these guidelines in selecting Abstract 3D images:

-  Choose images with uniformity rather than a few focussed subjects
-  Avoid images with a single isolated shape in the foreground
-  Choose images that showcase speed, depth or a larger-than-life scale
-  Generative AI images may be used in this category

Images

Business

This is the primary style of imagery to be used in brand communications. Selection guidelines for these images are as follows:

-  Choose images that depict one or more people engaged in business-centric discussion or work
-  Choose images that are lively, depict business activities, and effectively illustrate the context
-  Choose well lit images with clean compositions and generous negative space so they can be combined with the graphic device effectively
-  Show diversity in subjects by depicting people from all ethnicities

Images

Metaphorical

Metaphorical images contain visuals of people engaged in sporting and adventure activities. They must depict a triumphant scene, evoke a feeling of accomplishment. The metaphorical images may be combined with the full color graphic device if needed.

Treatment

Outline Design Element

Abstract 3D images are combined with the outline graphic device for use in banners. They may be placed as an overlay or integrated within the image as shown.

Treatment

Integrated Composition

These images are integrated with the design element in white and purple. The element must be incorporated into the image as shown and highlight the focal point, primary subject or primary point of interest in the image.
